### **3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

IFRS 9 – Financial Instruments (“IFRS 9”) was issued by the IASB in November 2009 with additions in October 2010 and May 2013 and will replace IAS 39 Financial Instruments: Recognition and Measurement (“IAS 39”). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9, except that an entity choosing to measure a financial liability at fair value will present the portion of any change in its fair value due to changes in the entity’s own credit risk in other comprehensive income, rather than within profit or loss. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. Earlier adoption is permitted. The Company is considering the potential impact of the adoption of IFRS 9.

IFRS 15 - Revenue from Contracts with Customers (“IFRS 15”) addresses how and when entities recognize revenue, as well as requires more detailed and relevant disclosures. IFRS 15 supersedes IAS 11 Construction Contracts, IAS 18 Revenue, IFRIC 13 Customer Loyalty Programs, IFRIC 15 Agreements for the Construction of Real Estate, IFRIC 18 Transfers of Assets from Customers and SIC-31 Revenue - Barter Transactions Involving Advertising Services. The Section provides a single, principles based five-step model to be applied to all contracts with customers, with certain exceptions. The standard is effective for annual periods beginning on or after January 1, 2018. Earlier application is permitted. The Company intends to adopt the new Standard on its effective date and is currently considering the potential impact on its financial reporting.

IFRS 16, *Leases* (“IFRS 16”) replaces IAS 17, *Leases* (“IAS 17”). The new model requires the recognition of almost all lease contracts on a lessee’s statement of financial position as a lease liability reflecting future lease payments and a ‘right-of-use asset’ with exceptions for certain short-term leases and leases of low-value assets. In addition, the lease payments are required to be presented on the statement of cash flow within operating and financing activities for the interest and principal portions, respectively. IFRS 16 is effective for annual periods beginning on or after January 1, 2019, with early adoption permitted if IFRS 15, Revenue from Contracts with Customers, is also applied. The Company is evaluating the impact of the adoption of IFRS 16 and at this time the Company does not anticipate a material impact to the financial statements.

### **4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS**

The preparation of financial statements in conformity with IFRS requires the Company’s management to make judgments, estimates and assumptions about future events that affect the amounts reported in these condensed interim financial statements and related notes to the financial statements. Although these estimates are based on management’s best knowledge of the amount, event or actions, actual results may differ from those estimates. The areas which require management to make significant judgments, estimates and assumptions in determining carrying values are described in Note 4 of the Company’s audited annual consolidated financial statements for the year ended July 31, 2016. Changes to these judgements, estimates and assumptions are presented below.

### 4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (continued)

- Investment in Aguia Resources Ltd. (“Aguia”) – On April 7, 2015, the Company’s President and CEO, Mr. Justin Reid, was appointed to the Board of Directors of Aguia as Managing Director. As a result, management re-assessed the level of influence that the Company has with respect to Aguia and determined that the Company has significant influence despite owning 17.08% of the outstanding common shares of Aguia at January 31, 2017. In January 2016, the Company’s President, Mr. Paul Pint, was also appointed a director and Chairman of the board of Aguia. On this basis, the investment, which had been accounted for as Fair Value Through Profit and Loss (“FVTPL”) on the statement of financial position prior to April 7, 2015, is now considered an associate and is accounted for using the equity method. In addition, management determined the value of its 1% net smelter return royalty (“NSR”) on the Rio Grande project held by Aguia is \$nil based on the uncertainty due to the early stage of the project. The Company reviews the carrying value of the investment whenever events or changes in circumstances indicate that impairment may be present. Estimates are made and assumptions are used in this review, and these are subject to various risks and uncertainties which may ultimately have an effect on the expected recoverability of the carrying value of this investment.
- Assets and disposal groups held for sale -- As security for default on the loan with APIO Africa Ltd (“APIO”), in June 2016, the Company received 8,169 shares of APIO’s subsidiary, Daos International Ltd. (“Daos”), a Mauritius company. As a result, the Company owned an 82% interest in Daos. The Company appointed three members to the board of Daos in June 2016 and controls the board of Daos. In October 2016, Daos issued additional shares to the Company in compensation for costs incurred by the Company related to Daos and the APIO loan. As at January 31, 2017, the Company owns 98% of the issued and outstanding shares of Daos. The Company has initiated a sale process to sell the assets of Daos in order to recoup the defaulted loan. The Company has assessed the situation at January 31, 2017 and concluded that the investment in Daos can continue to be accounted for as a disposal group held for sale in accordance with IFRS 5, Non-current Assets Held For Sale and Discontinued Operations. As a result, assets and liabilities related to Daos are presented separately on the statements of financial position. The Company has valued the assets at \$nil and has concluded that there is no constructive obligation on the part of the Company with respect to the Daos liabilities. Estimates are made, assumptions are used and management judgement is exercised in this assessment. These are subject to various risks and uncertainties which may ultimately have an effect on the expected recovery of these assets.

During the six months ended January 31, 2016, the Company entered into loan agreements whereby the Company loaned a total of US\$1,050,000 (\$1,384,138) to APIO with a maturity of May 2016. Aguia is incorporated in Australia and listed on the ASX. Aguia's primary focus is on the exploration and development of large scale phosphate and potash projects in Brazil. The Company also acquired a 1% NSR on the Rio Grande project held by Aguia. Aguia has the option to buy-back the NSR royalty for AUD\$1,000,000 at any time up to November 2017.

On April 7, 2015, the Company's President and CEO, Mr. Justin Reid, was appointed as Executive Chairman of the Board of Aguia. On September 17, 2014, the Company granted and issued an aggregate of 3,000,000 RSUs to officers and employees of the Company. Each RSU entitled an officer or an employee of the Company to receive one common share of the Company to be purchased in the secondary market by an independent trustee upon the vesting of such RSU, subject to acceleration upon a change of control of the Company. The 3,000,000 RSUs vested in three equal tranches, on each of January 1, 2015, January 1, 2016 and January 1, 2017. The fair value of the RSUs was determined to be \$0.55 per unit on the date of grant.

On January 5, 2016, the Company granted and issued an aggregate of 500,000 RSUs to an officer of the Company. Each RSU entitles the holder to receive one common share of the Company to be purchased in the secondary market by an independent trustee upon the vesting of such RSU, subject to acceleration upon a change of control of the Company. The 500,000 RSUs vest in three equal tranches, on each of January 5, 2017, January 5, 2018 and January 5, 2019. The fair value of these RSUs was determined to be \$0.26 per unit on the date of grant.

On January 13, 2016, the Company granted and issued an aggregate of 875,000 RSUs to officers and employees of the Company. Each RSU entitles the holder to receive one common share of the Company to be purchased in the secondary market by an independent trustee upon the vesting of such RSU, subject to acceleration upon a change of control of the Company. The 875,000 RSUs vest in three equal tranches, on each of February 1, 2016, February 1, 2017 and February 1, 2018. The fair value of these RSUs was determined to be \$0.23 per unit on the date of grant.

The Company granted DSUs to the Company’s independent directors. Each DSU entitles the holder to receive a cash payment equal to the market price of one common share of the Company. The DSUs vest based on the pro-rata number of days each independent director remains a director of the Company until January 1, 2017 for 600,000 DSUs that are currently issued and until March 30, 2018 for 300,000 DSUs that are currently issued, except in the event of an earlier change of control, in which case, the DSUs will vest fully upon such change of control.

As at January 31, 2017, 776,673 DSUs related to current directors have vested and entitle the holders, upon ceasing to hold office, to receive a cash payment of \$248,535 equal to an average market price of \$0.32 for each DSU. This amount is recorded as a liability on the condensed interim consolidated statements of financial position.

### 13. CAPITAL MANAGEMENT

The Company considers its capital structure to consist of share capital, warrants and share purchase options. The Company manages its capital structure and makes adjustments based on the funds available to support the acquisition, exploration and development of its mineral properties. The board of directors has not established quantitative return on capital criteria for management and relies on the expertise of management and the board of directors to sustain future development of the business.

The management and board of directors of the Company review its capital management approach on an ongoing basis and believe it reflects a reasonable approach given the relative size of the Company's assets. The Company and its subsidiaries are not subject to externally imposed capital requirements.

### 14. FINANCIAL INSTRUMENTS

Financial assets and financial liabilities at January 31, 2017 were as follows:

	Assets at fair value through profit or loss	Loans and receivables	Other financial liabilities	Total
<b>As at January 31, 2017</b>				
Cash and cash equivalents	\$ 291,477	\$ -	\$ -	\$ 291,477
Investments	16,081,178	-	-	16,081,178
Amounts receivable and other	-	134,329	-	134,329
Accounts payable and accrued liabilities	-	-	345,722	345,722

#### *Fair value hierarchy*

The three levels of the fair value hierarchy with respect to required disclosures about the inputs to fair value measurements are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and,
- Level 3 – Inputs that are not based on observable market data.

The following table sets forth the Company's financial assets and liabilities measured at fair value by level within the fair value hierarchy as at January 31, 2017.

	Level 1	Level 2	Level 3	TOTAL
<b>As at January 31, 2017</b>				
Cash and cash equivalents	\$ -	\$ 291,477	\$ -	\$ 291,477
Investments	13,684,118	2,397,060	-	16,081,178

The carrying value of cash and cash equivalents, amounts receivable and other, and accounts payable and accrued liabilities reflected in the condensed interim statement of financial position approximate fair value because of the relatively short-term maturities.

#### *Interest rate risk*

Loans receivable bear interest at fixed rates. All other financial assets are non-interest bearing. A 1% increase in interest rates, based on the balance of cash, cash equivalents and fixed income investments at January 31, 2017, would result in an increase in annual interest income of approximately \$2,900. All liabilities as at January 31, 2017 are non-interest bearing.

### **14. FINANCIAL INSTRUMENTS (continued)**

#### *Foreign currency risk*

The Company operates in Canada and its functional currency is the Canadian dollar and major purchases are transacted in Canadian dollars. The Company has acquired some investments, including its investment in an associate, which are denominated in foreign currency. Management believes the foreign exchange risk derived from currency conversions is negligible and therefore does not hedge its foreign exchange risk.

#### *Credit risk*

The Company's credit risk is primarily attributable to cash and cash equivalents, loans receivable and amounts receivable. The Company has no significant concentration of credit risk arising from operations.

Cash and cash equivalents of cash and GICs held in financial institutions from which management believes the risk of loss to be remote. Financial instruments included in amounts receivable consist primarily of goods and services tax and harmonized sales tax due from the Federal Government of Canada.

#### *Liquidity risk*

As at January 31, 2017, the Company had net working capital of \$16,246,260, which included cash and cash equivalents of \$291,477, investments of \$16,081,178, and amounts receivable and prepaid expenses of \$219,327, offset by current liabilities of \$345,722. The Company expects to rely on its existing net working capital to finance its ongoing planned activities.

#### *Price risk*

The Company is exposed to price risk with respect to commodity prices. Commodity prices fluctuate on a daily basis and are affected by numerous factors beyond the Company's control. The supply and demand for commodities, the level of interest rates, the rate of inflation, investment decisions by large holders of commodities including governmental reserves and stability of exchange rates can all cause significant fluctuations in commodities prices. Such external economic factors are in turn influenced by changes in international investment patterns and monetary systems and political developments.

#### *Securities price risk*

The Company carries investments in certain public securities for which price fluctuations can affect the Company's earnings. The Company classifies these investments as fair value through profit and loss where price volatility is reflected in earnings.

### **15. RELATED PARTY DISCLOSURES**

The Company entered into the following transactions in the ordinary course of business with related parties that are not subsidiaries of the Company.

#### *Related party balances*

The Company is party to certain management contracts. These contracts contain minimum commitments of approximately \$1,300,000 (as at July 31, 2016 - \$1,300,000) and additional contingent payments of approximately \$7,170,000 (as at July 31, 2016 - \$7,170,000) upon the occurrence of a change of control. As the likelihood of a change of control is not determinable, the contingent payments have not been reflected in these annual financial statements.

The Company is currently involved in a litigation proceeding with APIO whereby APIO is challenging the Company's actions with respect to the transfer of the DAOS shares. APIO is seeking monetary compensation. A reliable estimate of the amount of the claim cannot be made at this time given the early stages of the claim. The probability of the outcome is also uncertain. The Company is vigilantly defending its actions with respect to these claims.
